

STOCKHOLM UNIVERSITY
Department of Sociology

Syllabus of "Master's Thesis in Demography (the 1 year programme)", SC, 15 ECTS
(Kursplan för magisteruppsats i demografi, AN, 15 högskolepoäng)

Instructor: Livia Oláh, livia.olah@sociology.su.se

Decision

The syllabus is approved by the Board of the Department of Sociology, Stockholm University as of April 23, 2015.

Educational entry requirements

Population Development and Social Change 7.5 ECTS, Basic Demographic Methods 7.5 ECTS, Population Processes 7.5 ECTS, and having been admitted at the 1-year Master's program in Demography (SDEMO).

Course content

The course is provided at full-time basis over ten weeks. In the course the student will acquire the ability to independently carry out a research project with demographic relevance and report the outcome in a thesis.

Learning outcomes

Upon the completion of the course the student is expected to be able to:

In terms of knowledge and understanding:

- Interpret demographic data and research results and discuss their validity

In terms of accomplishments and competence:

- Formulate relevant demographic research questions and hypotheses
- Link theory and appropriate methods for a specific demographic research question
- Work independently to carry out a minor scientific study of demographic relevance
- Write and present a scientific text with demographic content
- Write and present a report on demographically relevant questions that can be understood by persons without special knowledge in the area

In terms of attitudes and values:

- Search for, compare and critically review demographic data and literature relevant for a particular research question
- Identify and deal with ethical questions in demographic research

Teaching

Teaching is provided via an introductory seminar, thesis supervision, mid-term seminar and a thesis seminar. Time and place for the seminars are announced via the course's MONDO site. Students are entitled to 24 hours supervision, of which amount one third is assigned as contact time.

Under extraordinary circumstances, students can be granted a change of supervisor. A request, specifying the grounds for the request, shall be sent to the instructor in charge of the thesis course. In case a change is granted, the number of hours so far consumed will be deducted from the hours of supervision with the new supervisor.

Assessment and examination

a. The thesis is presented at a public seminar and critically reviewed by an assigned peer discussant and an examiner. All students are expected to participate at the thesis seminar as well as to provide a thorough discussion of another student's thesis.

b. The thesis is graded as Good, Sufficient or Not sufficient on each of the following criteria:

1. Relevance of the arguments for the importance of research and the particular research question in the applied context.
2. Comprehensiveness and synthesis of relevant theory and previous research in the applied context.
3. Critical approach to relevant previous research, identifying strengths and weaknesses and gaps filled by the thesis research.
4. Logical organization of theory and previous research with respect to the research question.
5. Appropriateness of data and methods in the applied context.
6. Clear and comprehensive description of data and research methods.
7. Clear and comprehensive presentation of results.
8. Interpretation of results in relation to previous theory and research in the applied context.
9. The oral defense of the thesis at a thesis seminar.

In the case that a thesis demonstrates exceptional skills with regard to theoretical argument, data management, or application of analytic methods, the total number of criteria evaluated as "good" may be increased by one.

The overall grade for the thesis is then determined as follows:

A - Excellent: Good on at least 8 of the 9 criteria, Sufficient on all others B

– Very good: Good on 7 of the 9 criteria, Sufficient on all others

C - Good: Good on 5 or 6 of the 9 criteria, Sufficient on all others

D - Satisfactory: Good on 3 or 4 of the 9 criteria, Sufficient on all others

E - Sufficient: Good on none or at most two of the 9 criteria, Sufficient on all others Fx

- Not sufficient: Not sufficient on 1-4 criteria

F - Fail: Not sufficient on 5-9 criteria

c. Students with grade Fx are given an opportunity to revise the thesis to achieve a grade of E at least. Students who received grade Fx or F can redo the exam as long as the course is provided to achieve a grade of E at least. A student with grade E or higher is not entitled to another examination to raise his/her degree.

Students who received grade Fx or F on exams twice from the same examiner can request to be evaluated by another examiner. Such request should be sent to the Director of Studies. Students can request to have examination according to this syllabus up to three semesters after it has stopped to be valid. Such request should be sent to the Director of Studies.

Other issues

Student who don't complete the thesis within the course period can apply to have remaining hours of supervision transferred to a later semester. This can be granted provided that the supervisor and the Director of Studies give their approval.

Literature and data

Literature and data are chosen as appropriate for the thesis project.
