

Stockholm
University

Department of Sociology

Population Processes, 7.5 ECTS-credits, fall semester 2017

Syllabus

Coordinator and main instructor:

Livia Sz. Oláh (tel: 08 - 16 28 76, e-mail: livia.olah@sociology.su.se)

Contents

Course at advanced level, aims to familiarize students with the three main population processes -- fertility, mortality and migration -- by focusing on population developments in Sweden and Europe from the end of the 1800s onwards, with some attention to the major population trends and issues in poorer countries. The course is structured in three parts. Family dynamics focuses especially on the links between female employment, family policies and childbearing. The section on migration considers the causes and consequences for individuals and society of international and internal migration. The final section considers both biological and social aspects of morbidity and mortality.

Organization

The course is provided at full-time basis over 4.5 weeks (October 31 - November 29). Teaching is conducted through lectures in form of interactive presentation with the students' active participation. Participants meet three-four times a week during 3.5 weeks. About one week is devoted to the independent take-home exam.

Learning outcomes

Upon the completion of the course the student is expected to be able to:

In terms of knowledge and understanding:

- Analyze population development, historical as well as contemporary patterns, with respect to fertility, mortality and migration in various contexts based on relevant theories as well as empirical data. Discuss probable development in the next few decades based on today's demographic trends
- Describe and discuss changes in the family patterns in the developed world since the 1960s. Explain the connection between these changes, female employment, and various welfare state (family policy) models
- Contrast trends related to different causes of death, describe and explain gender differences and differences across socio-economic groups in mortality as well as the changes over time
- Compare and evaluate different migration theories; identify, describe and analyze the driving forces of migration in Sweden, in Europe and in a global context

In terms of accomplishments and competence:

- Write shorter scientific texts in demography or with demographic content

In terms of attitudes and values:

- Search for, compare and critically review demographic data and literature relevant for a particular research question
- Comment on texts with demographic content

Assessment and examination

The form of assessment is a written take-home exam of three essay questions (individual work; answers to be provided at a length of about five pages per question, line spacing: 1.5, font: Times New Roman, size: 12). Students are also expected to participate actively in the discussions during the course.

The student's achievement for the take-home exam is evaluated separately for each exam questions based on a criterion-referenced assessment, specified below. In a next step, the evaluations of all exam responses are summed up in a single grade, as follows:

A = Excellent – if the lowest evaluation for at most one question is a B

B = Very good – if the lowest evaluation for at most one question is a C

C = Good – if the lowest evaluation for at most one question is a D

D = Satisfactory – if the lowest evaluation for at most one question is an E

E = Sufficient – if the lowest evaluation for any question is an E, and at least two questions are evaluated with E

F_x = Not sufficient – if one or more questions are evaluated with F_x and none with F

F = Fail - if at least one question is evaluated with F

Responses on each exam questions are assessed based the following criteria:

A = Excellent. To achieve this grade, the student needs to demonstrate in-depth, critical reflections over the relevant demographic literature as well as data of fertility, mortality and migration, both in the discussions in the class and in the home exam. S/he should be able to generalize upon empirical results presented in others' and own works.

B = Very good. To achieve this grade, the student needs to demonstrate good ability to identify main perspectives and conflicting viewpoints in the demographic literature relevant for the topics of the course. Her/his work should prove of analytical strength.

C = Good. To achieve this grade, the student needs to demonstrate a thorough understanding of the relevant literature. Her/his work should prove of good skills to link theory and empirical material in discussing issues relevant to population processes.

D = Satisfactory. To achieve this grade, the student needs to demonstrate good knowledge of the theories and trends covered in the course being able to apply them in discussion on issues where relevant.

E = Sufficient. To achieve this grade, the student needs to demonstrate general understanding of the literature as well as basic knowledge of the main topics of the course. Her/his work shows a minimal level of critical approach to demographically relevant texts and data.

Fx = Not sufficient. To achieve this grade, the student needs to demonstrate some understanding of the main topics discussed, along with sporadic gaps in basic knowledge.

F = Fail.

Students with grade Fx or F at an exam are entitled to take another exam as long as the course is provided in order to achieve grade E at least. A student with E is not entitled to another examination to raise his/her degree.

Students who received grade Fx or F on exams twice from the same examiner can request to be evaluated by another examiner. Such request should be sent to the Director of Studies.

Students can request to have examination according to this syllabus up to three semesters after it has stopped to be valid. Such request should be sent to the Director of Studies.

Literature

The course literature consists of:

1) the following book (to be ordered by the student at least two weeks before course start at: www.adlibris.com, www.bokus.com, or www.amazon.com):

Castles, Stephen, de Haas, Hein & Mark J. Miller (2014): *The age of migration. International population movements in the modern world* (5th edition, paperback). Basingstoke: Palgrave Macmillan. (chapters 1, 2, 5, 6, 11, 12)

2) a number of relevant articles (to be downloaded from the internet, using own SU account) – see Appendix

Schedule: Population Processes, 7.5 ECTS-credits, fall semester 2017

<u>DATE</u>	<u>TIME</u>	<u>LOCAL</u>	<u>TOPIC</u>	<u>TEACHER</u>
October 31 (Tuesday)	10-13	D 231	<i>Changes in family patterns in industrialized countries</i>	Livia Sz. Oláh
November 1 (Wednesday)	11-13	E 339	<i>Proximate determinants and measures of fertility; fertility transition in developing countries</i>	Livia Sz. Oláh

November 17 (Friday)	10-12	F 247	<i>Theories of migration; Integration of immigrants in the labor market</i>	Eleonora Mussino
November 21 (Tuesday)	13-15	F 255	<i>Other aspects of immigrant socio-economic integration</i>	Eleonora Mussino
November 22 (Wednesday)	13-15	D 231	<i>Demographic aspects of international migration</i>	Eleonora Mussino

Submission deadline for the home-exam: November 29 (Wednesday) by 23 p.m. at the latest

Form of submission:

- to *Assignments* at the course MONDO site, and
- by leaving a *paper copy* of the exam (separately for the 3 parts, with your name on each part), along with a signed “Appendix 4” regarding plagiarism, the next day at the latest in the mailbox of the course instructor (Livia Olah) in the mail-room (B building 9th floor). Without the paper copy, the exam will NOT be corrected.

APPENDIX

Population Processes, 7.5 ECTS-credits, fall semester 2017
